### Marketplace for:

**Pillar 3a  
Securities  
Solutions**

**FZG  
Securities  
Solutions**

Descartes   finpension   frankly  
OLZ   Tellco

A small step for mankind, a big milestone for Economico!

From now on, you can use Economico to transparently compare the top providers of 3a securities solutions and vested benefits solutions (FZG) who are not afraid of competition. The various offers are sorted into homogeneous risk classes, which can be conveniently selected according to your risk preferences.

The following key criteria are compared when comparing offers:

**Performance & risk:** Based on the historical performance figures submitted by the providers, various return and risk indicators are compared across all offers. Not only the level of the performance figures is assessed, but also the quality of the figures submitted.

**Costs:** Annual asset management costs are compared on the basis of TER costs. (more on this in the white paper on asset management costs). The provider-specific detailed analyses contain further information on the provider-specific additional costs in accordance with the providers' cost regulations.

**Taxes:** Asset management in a 3a or vested benefits foundation offers tax advantages compared to independent asset management. However, the various offerings differ in the extent to which these tax advantages are implemented in the investment solution. Information on the tax efficiency of specific offerings can also be found in the detailed analysis.

In the next few flashes, we will report in more detail on the content and significance of the various comparison criteria. In the meantime, we would be delighted if you would take a look at our new marketplaces. To view the detailed content, you still need to register, but this is guaranteed to be free of charge (and will remain so)!

Let's go!
